Melhore sua produtividade

O sistema de refrigeração Flow-Master funciona levando o líquido refrigerante com a máxima eficiência. O volume e a velocidade do líquido refrigerante que atinge diretamente a aresta de corte da pastilha, aumenta o desempenho da mecanização.

O sistema de ferramentas Flow-Master é extremamente efetivo, extraindo o calor da aresta de corte, arrefecendo as aparas e ajudando a que se quebrem mais rapidamente.

As aparas com pouca absorção de calor são maleáveis e flexíveis, não se rompem facilmente e adicionam mais calor à aresta de corte.

Aumento das prestações até 50% com uma pressão de 70 bares

■ Principais vantagens

- Maiores velocidades e avanços
- Maior duração da ferramenta
- Melhor acabamento das superfícies
- Maior control e evacuação da apara
- Sistema fácil sem acessórios
